Solution? Zero-padding! , Others !!

- For $s = 1$, surround the image with $(h_f - 1)/2$ and $(w_f - 1)/2$ layers of 0

0	0	0	0	0	0	0
0	1	1	1	0	0	0
0	0	1	1	1	0	0
0	0	0	1	1	1	0
0	0	0	1	1	0	0
0	0	1	1	0	0	0
0	0	0	0	0	0	0

$*$

0	0	1
0	1	1
1	1	1

$=$

1	1	2	0	0
0	1	1	1	0
0	0	1	2	1
1	0	2	1	0
0	1	1	3	0

Original 5x5

After padding ONE pixel (surrounding the image) it will be 7x7

After apply one filter of size 3x3 , output will be 5x5 again

Do the same for next applied filter
