# Solution? Zero-padding! , Others !!

- For $s = 1$, surround the image with $(h_f - 1)/2$ and $(w_f - 1)/2$ layers of 0

**Original 5x5**

After padding ONE pixel (surrounding the image) it will be 7x7

After apply one filter of size 3x3 , output will be 5x5 again

Do the same for next applied filter
